

TECHNOLOGY

JCRf1 Fall Bearing Red Raspberry (Caroline)

OVERVIEW

This invention is a unique fall bearing red raspberry cultivar, JCRf1. The fruit of the new species is 25% larger than the standard fall bearing cultivar for the region 'Heritage.' It also ripens fruit 3 weeks earlier in the fall than 'Heritage' which allows culture in areas further north than now attempted. The species is particularly adapted to the growing conditions found in eastern North America.
