

## TECHNOLOGY

# Virtual Electronic Network University Scheduler (VENUS™)

## OVERVIEW

VENUS generates student course schedules based on information from university computers. After the student enters the desired courses, VENUS considers all possible permutations and returns to the student those schedules that best fit the specifications. VENUS' interface is over the World-Wide Web, so platform independence and overall availability are ensured. There are also options to let the student view course and general requirements listings, optionally "checking off" the courses desired.

For more information, contact the Office of Technology Commercialization, 301-405-3947 or [otc@umd.edu](mailto:otc@umd.edu).
