

TECHNOLOGY

Manufacturing Extension Information System (MEIS™)

OVERVIEW

MEISTM is a database interface software that is the front end for Microsoft Access. It allows for data collection, tracking, and reporting. The interface and database structure allow the user to track daily interaction with companies. It is a relational database -- each company profile is linked to many discrete activities. MEISTM was developed to meet specific reporting and tracking requirements for the National Institute of Standards and Technology, Manufacturing Extension Program.

The University of Maryland has copyright and trademark protection in regards to this software application. For further information, please contact the Office of Technology Commercialization, (301) 405-3947, E-mail: otc@umd.edu.
